

MODULAR INDIRECT FIRED BENT TUBE HEATER (IBT)

closed view

The Modular Indirect Fired Bent Tube Heater (Model IBT) is designed to deliver clean air into an indoor environment. The push-through design of the unit ensures that combustion fumes will not enter the fresh air stream being delivered into the space.

The standard unit includes a blower module and the indirect heater module with multiple options for discharge and intake. Five housing sizes are available in our modular design with up to four furnaces available in one unit. The air volume range is from 800 to 15,000 CFM and up to a maximum of 3 inches wg. for static pressure.

FEATURES & BENEFITS

- ETL Listed
- Modular Design for Added Flexibility
- Bent Tube In-Shot Style Furnace with Type 409 Stainless-Steel Heat Exchanger
- High Turndown Ratio Ranging from 6:1 to Maximum of 28:1
- Fully Modulating Gas Output Control Standard
- Constant 83% Efficiency Over Entire Gas Firing Range — Variable Power-Vent Blower Speed Control
- Standard High Fire Start to Ensure Optimum Light-Off
- Standard Inlet & Manifold Pressure Gauges
- Light Weight Design with Condensed Footprint
- Isolated & Insulated Electrical Controls Vestibule
- Fully Insulated Cabinet and Power-Venter Post Purge for Condensation Prevention
- End Discharge or Integral Down Discharge
- Option for Dedicated Combustion
- Discharge, Space or Building Automation System (BAS) Temperature Control

ADDITIONAL OPTIONS

- 5:1 Turndown for Propane (LP) to Maximum of 23:1
- Blower on Delay for Heat Exchanger Reheat
- Motorized Intake Damper
- Single Point Electrical Connection
- Freeze-stat Option
- Roof Curbs or Indoor Hanging Cradle
- Variable Air Volume (VAV) Controls

CERTIFICATIONS

- The unit is listed to the ANSI Z83.8-2006 and CSA 2.6-2006 standards.
- The furnace is certified by the American Gas Association and approved by the Canadian Gas Association.
